

C++ primer P82 练习3.10

```
#include <iostream>
#include <string>
using namespace std;
//using namespace string;
int main(){
    string s;
    string s1;
    getline(cin, s);
    for (auto &c : s){
        if (!ispunct(c)){
            s1 = s1 + c;
        }
    }
    cout << s1 << endl;
    return 0;
}
```
