

C++ primer P81 练习3.5

```
#include <iostream>
#include <string>
using namespace std;
int main(){
    string s,s1,s2;
    int i = 0;
    string str[100];
    while (cin >> s){
        str[i] = s;
        cout << s << endl;
        i++;
    }
    int j;
    for (j = 0; j <= i;j++){
        s1 = s1 + str[j];
        s2 = s2 + str[j]+" ";
    }
    cout << s1 << endl<<s2<<endl;
    return 0;
}
```
