# C++ primer P82 练习3.6

```cpp
#include <iostream>
#include <string>
using namespace std;
//using namespace string;
int main(){
    string s;
    cin >> s;
    for (auto &c : s){
        c = 'x';
    }
    cout << s << endl;
    return 0;
}
```
